Project title: Dirty Dancing Website

I'd like to build this site as something like an IMDB page. I want it to have multiple pages each devoted to different parts about the film, including a synopsis, character list, how it was critically received and its place in pop culture.

- Home page/introduction: introduce a short summary of the movie with basic information including director, a quick list of the major characters/actors.
- Synopsis
- Character list/actor list
- Criticism
- Significance/influence in pop culture
- Where are they now - Dirty Dancing stars
- Sources
